Marking Liquids

Whether it's for the Fleet range of traditional wheel-to-wheel machines or the ultimate in spray machines, the Kombi, the Fleet range of eco-friendly concentrated marking liquids have all been designed and developed to give ultimate performance and ease of use.

There's no mixing with Fleet's concentrates: the paint disperses easily with water, saving you both time and money. High dilution rates keep the price per field low, whilst retaining a quality of line difficult to beat.

Pitchmarker C

Ideal for spray machines *(can be used for wheel to wheel machines)*.

Supplied in 20 litre bucket, 200 litre drum or 1000 litre multifull.

Dilute between 2:1 and 4:1 for optimum performance.

Bright, rain resistant and long lasting line.
