Transfer Wheels

Made from coated steel, Fleets range of transfer wheel machines are used on premier sports stadiums to local club grounds alike. All of the machines have a unique curved tank ensuring that more paint is collected from the tank and transferred to the playing surface. The tank is easy to clean and simple push on and pull off lids prevent spillages and waste of product. Thoughtful design and high quality engineering guarantees consistent delivery rates and great lines every time. Fleet transfer wheel machines are all of a high build quality and extremely low maintenance"

Tim 2"
